

Serenity Therapeutics is pleased to announce the addition of a new and unique approach to health and wellness that addresses the whole body and supports natural healing.

BIOREGULATION THERAPY

Featuring the advanced Lux Pro Plus

Bioregulation Therapy (BRT) is a holistic, non-invasive, gentle modality that uses low-intensity, pulsed electromagnetic field (PEMF) technology, along with targeted BRT protocols, to help improve your body's biological communications at the cellular level. Well-functioning communication between every cell of your body is critical for maintaining good physical and emotional health. BRT can help the body improve self-regulation, increase natural healing activities and restore overall wellness.

The LENYO Lux Pro Plus

The advanced Lux Pro Plus BRT device is designed to address a broad spectrum of physical and emotional concerns – both acute and chronic. It can stand alone or work alongside any of our other services – neurofeedback, speech therapy, equine therapy – to support a whole-body, whole-health, therapy plan. BRT is safe for children and adults and can also be used on animals.

During a simple and comfortable BRT session, the Lux Pro Plus can help to:

- Calm the nervous system
- Increase relaxation
- Reduce anxiety
- Lessen depression
- Balance energy and address ADHD
- Improve sleep quality
- Manage the symptoms of trauma and PTSD
- Address the Autism Spectrum Disorder
- Accelerate detoxification
- Break down “therapy blocks”

For more information about our new BRT service, or to set up an appointment to experience this powerful technology first-hand, contact us at 928-899-0723 or visit our website at www.serenitytherapeuticsllc.com.
