DEAR PHYSICIAN:

Your patient is interested in Therapeutic Horseback Riding/Equine Therapy. Each student must submit a completed physician assessment form and release to enroll in our program. Your completion of this form will assist our instructors in designing an individual lesson plan for your patient that is first and foremost safe in addition to being effective. To ensure the safety of your patient (our client/student), please fill these forms out carefully and completely. **Please do not leave any blank spaces.**

Equine Therapy/Therapeutic Horseback Riding is widely accepted as a useful method of improving the physical, mental and emotional well-being of those individuals with disabilities. The horse's soothing rhythm, strength, warmth and three-dimensional movement pattern provides healthy exercise while improving circulation and muscle tone. The discipline associated with working with horses and the social interactions between peers benefit the mind, body and spirit, raising self-esteem and increasing self-sufficiency through accomplishment. The unconditional love and acceptance of the horse is proven to reduce anxiety, encourage interaction and offer a safe haven while riders can feel a sense of empowerment. Please feel free to call or visit if you would like more information.

Sincerely,

Serenity Therapeutics

D. ACTIVITY RISK CLASSIFICATION. INHERENT RISKS AND NATURE OF THE HORSE WARNING

Horseback riding is classified as a RUGGED ADVENTURE RECREATIONAL SPORT ACTIVITY. There are numerous obvious and non-obvious inherent risks always present in such activity despite all safety precautions. According to NEISS (National Electronic Injury Surveillance Systems of United States Consumer Products) horse activities rank approximately 64th among the activities of people relative to injuries that result in a stay at U.S. hospitals. Related injuries can be severe requiring more hospital days and resulting in more lasting residual effects than injuries in other activities. NO HORSE IS A COMPLETELY SAFE HORSE. Horses are 5 to 15 times larger, 20 to 100 times more powerful and 3 to 4 times faster than a human is. If a rider falls from a horse to the ground it will generally be at a distance of from 3 1/2 to 5 1/2 feet and the impact may result in injury or death to the rider. If a horse is frightened or provoked it may divert from its training and act according to its natural survival instincts which may include but are not limited to: stopping short; changing directions or speed at will; shifting its weight from side to side, bucking, rearing, biting, kicking or running from perceived danger.

Such helmets are available at THIS STABLE; however, THIS STABLE recommends the PARTICIPANT purchase their own helmet to receive the benefit of a custom fit. Wearing such headgear while mounting, riding, dismounting, and being around horses may prevent death or reduce the severity of head injuries resulting from a fall or other incident involving a horse. THIS STABLE abides by the NARHA Helmet l'landards and requires children under the age of 14 to wear an ASTM approved EQUESTRIAN helmet when mounted ,at all times.
